

The Ely Underground

Trying to put off the inevitable

A Letter From The Editor By: TLM

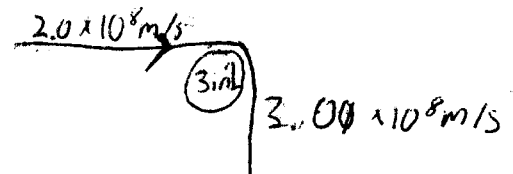

The feedback from the first issue of the Underground was overwhelmingly positive. Only when you include the fact I have moved up three positions on the Russian hit list, and have been added to the Lloyd/Ratboy list, does one see any negative affect from the preview issue. I feel that although the people on the hitlist are the first to go, it is these brave souls that help in the slowing of the inevitable.

At any rate, this issue introduces two new writers to the scene (in keeping with the protection, aliases will still be enacted at all times) Monkey Boy and The Fat. This issue deals with 3-In-1's sudden appearance and the affect he has had on Ratboy, a Russians attempt at the Homicide of a teacher, and the death of a friend. These, and other important issues facing mankind, are attacked in this great issue.

How Ratboy Uses 3-In-1 To Go The Speed Of Light By: Monkey Boy

While Ratboy has been able to travel at high velocities for quite some time now, it is a recent phenomenon that Ratboy has been able to achieve the speed of light. To achieve this, Ratboy has been able to utilize 3-In-1's tremendous gravitational pull, as shown in the figure:

Ratboy approaches 3-In-1 with speeds reaching 2.0×10^8 m/s. Then, using 3-In-1's great mass, accelerates to app. 3.0×10^8 m/s making him invisible to the average human eye. 3-In-1's addition to Christopher Lloyd's team makes all those who want a safer world for the next generation tremble in fear at what might become.

Well, It has been over one week since the Russians have penetrated our national defenses and have been spying on the students of Ely High, but already they are threatening out safety. On Thursday, September 28, one of the Russians put a brave and courageous teacher on their death list. This teacher (who will remain nameless for safety purposes) had enough guts to stand up to the little Communist. The russian agent then tried to incite a riot that would over throw this brave teacher by passing around a note with this quote "That is boring folks. Let's do it. Kill him (teacher)."

(ACTUAL LETTER ↑)

TLM: On Assignment

One item must be addressed from the first issue. Many people have complained that The Lizard Master is not what people know me by the most. In fact, to many, Rush Limbaugh and Ru Paul come to mind. I must dispell these rumors and point to the fact that the Russians and The Lloyd Gang are trying to publicly assassinate me before acting on the deed literally. Again, the Underground is dedicated to spreading the truth and dispell any probing problems of cancer causing groups that walk among us. -TLM

After this attempt failed, the Communist agent put this teacher on the feared "Russian Hit List". Other people who have been put on this list before include the famous folk hero Matthew Lopata, who after being put on the list was never seen again. Unfortunately, there is really nothing that can be done to save this teacher. The only person who is capable of stopping the russian single-handedly is "The Chosen One", but he is far too busy saving the world from the likes of a certain evil math teacher and her laser guns to do anything about the Russians. Of course, Christopher Lloyd and Ratboy could wipe out the Russians, but they are too preoccupied with conquering the world to worry about the Russian Communist agents.

Obituaries

We must mourn the passing of, as his closest friends knew him, The Doeboy. He was offically marked MIAPD 09/28/95. That is, Missing In Action....Presumed Dead. When reading this, you should bow your head in a moment of silence. Ok.
